Civil Posting

Civil Engineer

The City of Clive is currently accepting applications for a Civil Engineer in the Public Works Department. This position manages public infrastructure projects from concept and design through construction. The Engineer prepares, reviews and modifies civil engineering plan specifications for city projects. They will work with contractors and staff on public works-related issues and responds to general and project specific inquiries from the public. In addition, they will perform engineering and GIS related analysis, graphics and mapping. The Civil Engineer reports directly to the Engineering Services Administrator.

Clive, population 17,506, is a premier community to live, work, play, and raise a family. Residents consistently give the community the highest marks for safety, care for natural and open spaces, and value for taxes paid. Clive combines urban amenities with first rate school systems, a wide variety of housing options, a safe family environment, and an unsurpassed quality of life.

To be considered, candidates must have a Bachelor's Degree in Civil Engineering from a four (4) year accredited college or university and a Professional Engineering (PE) license issued by the State of Iowa. Five years as a Professional Engineer with progressively responsible work experience in civil engineering including field and office experience.

Compensation for the Civil Engineer is starting at $93,000. In addition, the City has an excellent benefit package with employer-provided health/dental/vision insurance, pension benefits and an employer matching 457 Plan.

The City of Clive application is available at www.cityofclive.com. Complete applications include a resume and cover letter to be uploaded in the application process. The applications will be accepted until the position is filled. EOE
